see video for how to construct variable width histograms on Nspire.

and composite bar charts.

This bar chart was chosen to clearly highlight the for larger number of males to females
It could have been done 'back to back' or indeed the raw figures could be turned
into %'s, and it would show the gender balance for each age group in 1981

Ex 3B no. 3

See video on how to create the required bar charts on TI-Nspire.

Ex 3B no. 4 + 5

see video on how to create histogram on Ti-Nspire.
